SUMMARY

Detail-oriented QA Engineer with hands-on experience in Manual and Automation Testing, skilled in Selenium WebDriver, Java, TestNG, SQL, Postman, and Jira. Experienced in Functional, Smoke, Sanity, Regression, Cross-Browser, and API Testing, with working knowledge of building Page Object Model (POM) automation frameworks and integrating tests into CI/CD pipelines. Passionate about delivering high-quality software and continuously improving testing processes.

SKILLS

- **Manual Testing:** Functional, Non-functional, Regression, Smoke, Sanity, and System Testing. Strong grasp of Agile/Scrum methodology, SDLC, and STLC. Skilled in test plan and test case design, defect logging, and triage using Jira.
- **Selenium & Automation:** Core Selenium concepts, Selenium/WebDriver architecture, and WebElement, Select, and Actions class methods. Strong knowledge of locator strategies (XPath, CSS Selectors, ID, Name).
- **Advanced Selenium Topics:** TestNG framework (annotations, assertions, test suites); Page Object Model (POM) design pattern; explicit and implicit waits; Data-Driven Testing (DDT) with Excel/TestNG DataProviders; handling dynamic elements, alerts, and multiple windows; and version control with Git/GitHub.
- **API Testing & Postman:** Hands-on API testing using Postman, including creating and organizing collections, building GET/POST/PUT/DELETE requests, using environment and global variables, writing assertions with test scripts, chaining requests, and validating JSON responses and status codes. Basic knowledge of REST API concepts.
- **SQL:** Working knowledge of DQL, DDL, DML, and DCL statements. Comfortable writing SELECT queries for data retrieval, filtering with WHERE, sorting with ORDER BY, and removing duplicates with DISTINCT.

PROJECTS

e-Commerce Domain

- Tested a feature-rich e-commerce web application end-to-end, covering registration, login, product browsing, cart management, order processing, payment integration, and account management.
- **Roles & Responsibilities:** Prepared detailed test plans and cases for registration, login, product search, cart, and payment modules. Performed functional, regression, and UI testing, automated regression cases with Selenium WebDriver + Java (Page Object Model), and conducted cross-browser testing across Chrome, Firefox, and Safari.

CRM Software

- Tested a CRM application for managing customer relationships and sales processes, including lead management, organization management, contact tracking, and reporting.
- **Roles & Responsibilities:** Analyzed business and functional requirements to build test plans, test cases, and test scenarios across all CRM modules (Organizations, Contacts, Industry, Contact-Complaint Tracking). Performed functional, regression, smoke, and exploratory testing across Admin, Customer, and Support user roles.

EXPERIENCE

Manual Testing Intern | QSpiders, Noida | 6 Months

- Completed a 6-month internship in Manual Testing, gaining hands-on experience in STLC, SDLC, test case design and execution, defect reporting using Jira, and Agile methodology. Practiced Smoke, Sanity, Functional, and Regression Testing across multiple modules and applications.
- Performed API testing using Postman, including building requests, setting up environments/variables, and validating responses and status codes.

Certification in Software Testing | QSpiders, Noida — Java, Selenium, TestNG, Manual Testing, SQL, API Testing (Postman).
